WSQ COURSE SLIDES

Creative Digital Art and Design

From confident sketch to purposeful, refined digital artwork

Course Code: TGS-2023037829

Trainer: Dr. Alfred Ang
Tertiary Infotech Academy Pte Ltd · UEN 201200696W

v8.0 · 19 August 2026

Concept visual · Original AI-generated artwork

© Tertiary Infotech Academy Pte Ltd

Digital Attendance (Mandatory)

1

AM attendance

Scan the SSG QR code at the start of each day.

2

PM attendance

Scan again after lunch when instructed.

3

Assessment attendance

A separate attendance event applies before assessment.

4

Attendance threshold

At least 75% attendance is required.

© Tertiary Infotech Academy Pte Ltd

GENERAL TRAINER PROFILE

Trainer Profile · General

Appointed Trainer

Tertiary Infotech Academy
course facilitator

ROLE
Digital art and design facilitator

DESIGNATION
Appointed WSQ trainer

QUALIFICATIONS
Relevant design and adult-learning credentials

AREAS OF EXPERTISE
Procreate, Sketchbook Studio and visual communication

TRAINING EXPERIENCE
Applied studio facilitation, critique and learner support

PROVIDER CONTACT
enquiry@tertiaryinfotech.com

© Tertiary Infotech Academy Pte Ltd

NAMED TRAINER

About the Trainer

Dr. Alfred Ang

Principal Trainer
Tertiary Infotech Academy

ROLE
Principal Trainer and courseware lead

PRACTICE
Digital creativity, design systems and applied technology

DELIVERS
WSQ adult-learning programmes and industry workshops

FOCUS
Make creative tools understandable, purposeful and transferable

© Tertiary Infotech Academy Pte Ltd

LEARNER INTRODUCTION

Let's Know Each Other

Your practice

Name, role and the kinds of visual work you make or commission.

Your tools

Tablet, stylus and experience with Procreate or Sketchbook Studio.

Your outcome

One visual capability you want to use after the course.

© Tertiary Infotech Academy Pte Ltd

STUDIO CULTURE

Ground Rules

1. **Participate**
   Experiment, ask and share evidence.

2. **Respect**
   Critique the work, never the person.

3. **Focus**
   Silence phones and keep one conversation at a time.

4. **Punctuality**
   Return from breaks ready to create.

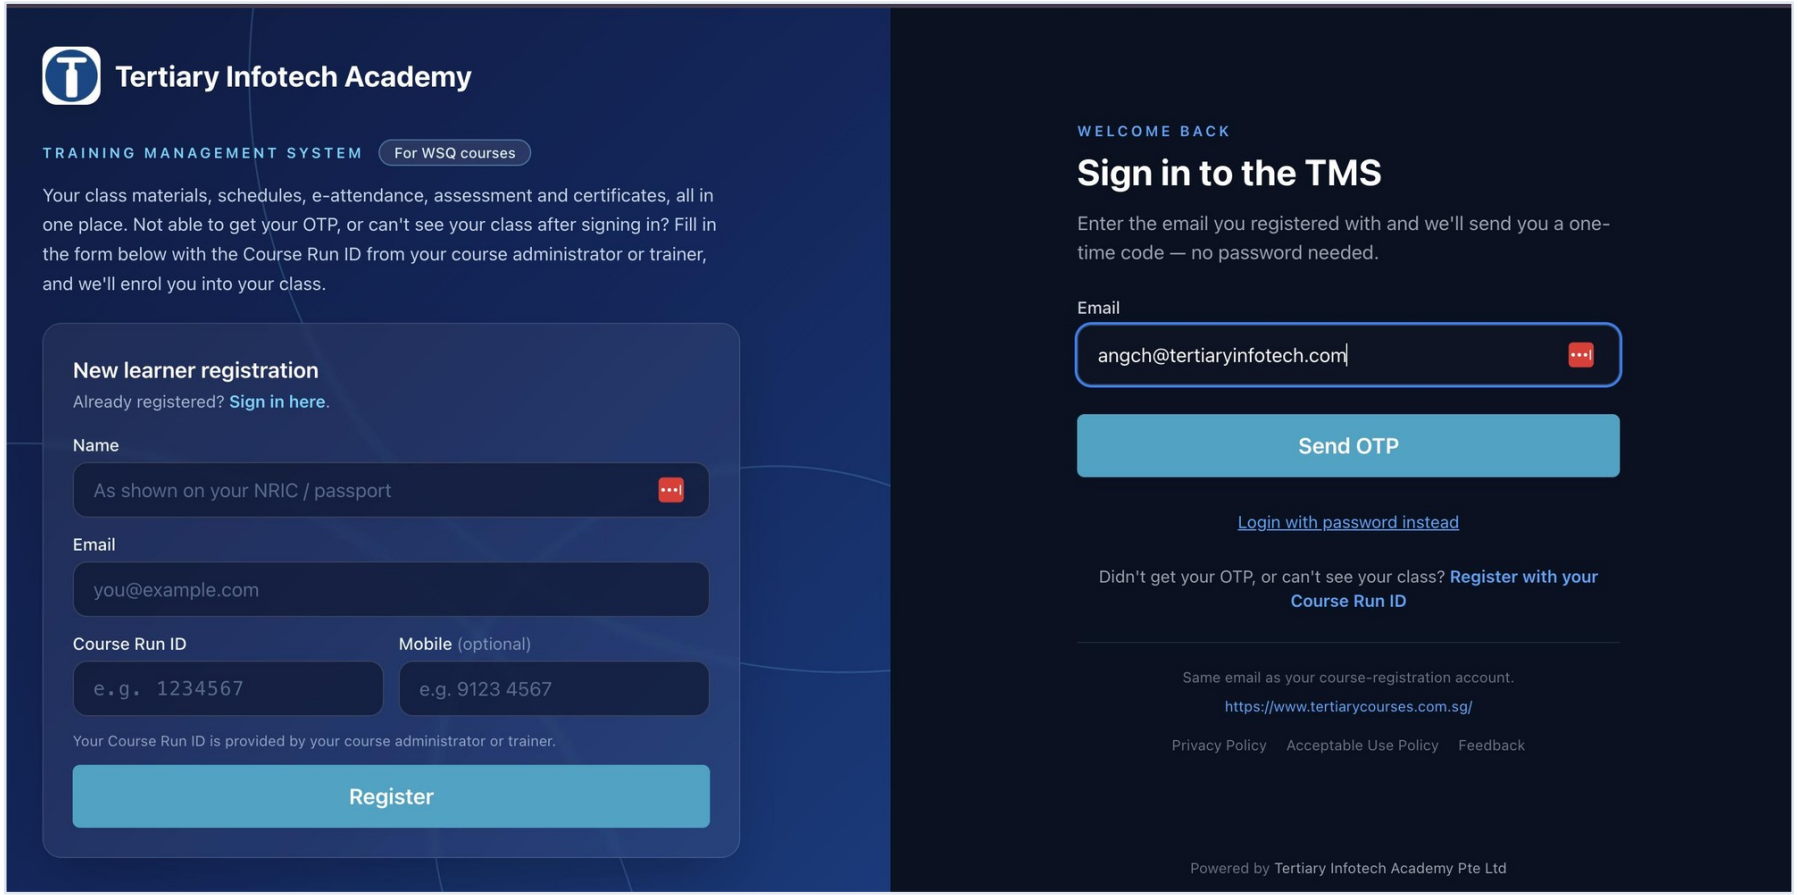

5. **Originality**
   Use owned or rights-safe reference material.

6. **Attendance**
   Maintain the WSQ minimum of 75%.

© Tertiary Infotech Academy Pte Ltd

COURSE PORTAL

Login to LMS and Download Course Material

Log in at lms-tms.tertiaryinfotech.com with your registered email and the OTP sent to your inbox, then open this course to download the slides and Learner Guide.

© Tertiary Infotech Academy Pte Ltd

THREE LEARNING UNITS

Course Outline

Topic 1

Aesthetics, briefs, sensory cues, planning, sketching and tools.

Topic 2

Brushes, colour, form, layers, perspective, depth and overlays.

Topic 3

Critique, emotion, accessibility, sustainability and refinement.

© Tertiary Infotech Academy Pte Ltd

9:00 AM–6:00 PM

Lesson Plan · Days 1–2

DAY 1 · FOUNDATIONS

- ✓ Aesthetic intent and sensory meaning
- ✓ Briefs, mood boards and sketching · Labs 1–4

DAY 2 · TECHNIQUE

- ! Brush, colour, form, layers and perspective
- ! Progressive production · Labs 5–9

© Tertiary Infotech Academy Pte Ltd

FINAL DAY

Lesson Plan · Day 3

DESIGN REVIEW

- ✓ Overlays, emotional design, accessibility and critique
- ✓ Advanced production · Labs 10–12

ASSESSMENT · 4:00–6:00 PM

- ! Written Assessment: 60 minutes
- ! Practical Performance: 60 minutes

© Tertiary Infotech Academy Pte Ltd

WHAT YOU WILL ACHIEVE

Learning Outcomes

1

LO1

LO1: Identify aesthetic design elements that incorporate sensory appeal in product and service design.

2

LO2

LO2: Assess and propose design changes that balance function and aesthetic appeal.

3

LO3

LO3: Review and create digital artwork that builds positive associations without overloading users' senses.

© Tertiary Infotech Academy Pte Ltd

DESIGN

Skills Framework

Aesthetic and Design Sensibility

Technical Skills and Competency
DSN-DES-4022-1.1

Knowledge

K1–K10 · aesthetics, bias, function, colour, form, good and emotional design.

Abilities

A1–A5 · diagnose, trade off, enhance, review and develop new aesthetics.

© Tertiary Infotech Academy Pte Ltd

BEFORE THE ASSESSMENT

Briefing for Assessment

1. **Individual work**
   No discussion; answer in your own words.

2. **Open book**
   Slides, Learner Guide and approved materials only.

3. **Clear workspace**
   Phones and other materials under the table.

4. **Integrity**
   No photos or recording of scripts.

5. **Hard copy**
   Use black or blue pen; no correction fluid.

6. **Submission**
   Upload completed answers and evidence to the LMS.

© Tertiary Infotech Academy Pte Ltd

OPEN BOOK

Assessment & Funding

WA · 60 min

10 open-ended questions covering K1–K10.

PP · 60 min

5 applied design tasks covering A1 –A5.

Competency

Pass every prescribed criterion and maintain at least 75% attendance.

© Tertiary Infotech Academy Pte Ltd

ON ASSESSMENT DAY

Assessment Flow

1. TRAQOM on the LMS
2. Assessment digital attendance
3. Sit WA then PP · open book
4. Submit answers on the LMS
5. Sign Assessment Summary Record

© Tertiary Infotech Academy Pte Ltd

COURSE REPOSITORY

Access the Hands-On Labs

Each lab has its own folder, detailed Markdown guide and matching PDF.

OPTION A · CLONE

git clone
https://github.com/tertiarycourses/TGS-2023037829-Creative-Digital-Art-and-Design.git

OPTION B · DOWNLOAD

GitHub → Code → Download ZIP

CHOOSE BY PURPOSE

Two Platforms, One Design Practice

PROCREATE

- ✓ Deep brush engine, advanced layers, masks and blend modes.
- ✓ Perspective, isometric, 2D and symmetry drawing guides.

SKETCHBOOK STUDIO

- ! Free pressure-sensitive pen, pencil, marker, crayon and watercolour tools.
- ! Layers, ruler, symmetry, page templates, tracing overlay, filters and AR preview.

Source lens: apps.apple.com

© Tertiary Infotech Academy Pte Ltd

01

TOPIC 1 · K1 · K2 · K3 · A1 · LO1

Fundamentals of Aesthetics in Digital Art

From intent and sensory meaning to confident marks and viable concepts

© Tertiary Infotech Academy Pte Ltd

CONCEPT MODEL

Aesthetics is experienced meaning

1

Form

Line, shape, colour, texture, space and motion.

2

Context

Where, why and by whom the work is experienced.

3

Association

Memories and cultural meanings carried by cues.

4

Response

Attention, emotion, comprehension and action.

Source lens: tertiarycourses.com.sg · coursera.org

© Tertiary Infotech Academy Pte Ltd

APPLY THE PRINCIPLE

Aesthetics is experienced meaning · choices

STRONG PRACTICE

- ✓ Name the intended response before choosing a style.
- ✓ Judge visual choices against audience and purpose.

COMMON RISK

- ! Adding effects because they look fashionable.
- ! Treating personal taste as universal evidence.

Source lens: tertiarycourses.com.sg · coursera.org

© Tertiary Infotech Academy Pte Ltd

PRACTITIONER CHECK

If the image were restyled, would the intended meaning survive?

Aesthetics is not decoration; it is how form, context and sensory cues shape interpretation.

Source lens: tertiarycourses.com.sg · coursera.org

© Tertiary Infotech Academy Pte Ltd

CONCEPT MODEL

From pigment to pixels

1

Traditional roots

Drawing, painting, printmaking and photography.

2

Early digital

Pixel constraints created deliberate grid-based forms.

3

Desktop era

Raster and vector tools expanded editing and reproduction.

4

Tablet era

Pressure, tilt and touch reintroduced direct hand control.

Source lens: tertiarycourses.com.sg · coursera.org

© Tertiary Infotech Academy Pte Ltd

APPLY THE PRINCIPLE

From pigment to pixels · choices

STRONG PRACTICE

- ✓ Borrow timeless principles while using digital affordances.
- ✓ Let the medium change workflow, not artistic intent.

COMMON RISK

- ! Assuming software automatically creates quality.
- ! Imitating analog texture without understanding its role.

Source lens: tertiarycourses.com.sg · coursera.org

© Tertiary Infotech Academy Pte Ltd

PRACTITIONER CHECK

Which part of the result depends on judgement rather than the app?

Digital art extends traditional mark-making with reversibility, layers, computation and rapid distribution.

Source lens: tertiarycourses.com.sg · coursera.org

© Tertiary Infotech Academy Pte Ltd

CONCEPT MODEL

Visual forms evolve with constraints

1

Pixel

Small units reward silhouette and controlled contrast.

2

Vector-like

Clean geometric edges communicate precision.

3

Painterly

Visible texture and variation suggest human touch.

4

Hybrid

Photography, drawing, type and effects can coexist.

Source lens: online.njit.edu · 21-draw.com

© Tertiary Infotech Academy Pte Ltd

APPLY THE PRINCIPLE

Visual forms evolve with constraints · choices

STRONG PRACTICE

- ✓ Choose a form language that fits the viewing distance.
- ✓ Design for the final output, not only the working canvas.

COMMON RISK

- ! Using tiny detail for mobile viewing.
- ! Scaling low-resolution work beyond its intended size.

Source lens: online.njit.edu · 21-draw.com

© Tertiary Infotech Academy Pte Ltd

PRACTITIONER CHECK

Can the essential silhouette and message survive at thumbnail size?

Resolution, display, interaction and distribution influence what visual forms become practical and persuasive.

Source lens: online.njit.edu · 21-draw.com

© Tertiary Infotech Academy Pte Ltd

CONCEPT MODEL

Aesthetics creates product and service value

1. **Recognition**
   A consistent visual voice makes an offer memorable.
2. **Trust**
   Coherence and craft signal care and competence.
3. **Usability**
   Hierarchy guides the eye toward the next action.
4. **Emotion**
   Tone and imagery create anticipation and belonging.

Source lens: tertiarycourses.com.sg

© Tertiary Infotech Academy Pte Ltd

APPLY THE PRINCIPLE

Aesthetics creates product and service value · choices

STRONG PRACTICE

- ✓ Use aesthetics to clarify the service promise.
- ✓ Keep brand signals consistent across touchpoints.

COMMON RISK

- ! Letting beauty hide essential instructions.
- ! Using premium cues that conflict with the real service.

Source lens: tertiarycourses.com.sg

© Tertiary Infotech Academy Pte Ltd

PRACTITIONER CHECK

What promise does the design make before the user reads a word?

Aesthetic choices signal quality, improve comprehension and form expectations before use begins.

Source lens: tertiarycourses.com.sg

© Tertiary Infotech Academy Pte Ltd

CONCEPT MODEL

Translate non-visual cues into visible form

1. **Sound**
   Rhythm, repetition, sharpness and spacing imply tempo.

2. **Touch**
   Edges, grain and material texture imply surface.

3. **Smell**
   Colour, atmosphere and familiar objects trigger memory.

4. **Temperature**
   Hue, contrast and haze suggest warm or cool air.

Source lens: tertiarycourses.com.sg · online.njit.edu

© Tertiary Infotech Academy Pte Ltd

APPLY THE PRINCIPLE

Translate non-visual cues into visible form · choices

STRONG PRACTICE

- ✓ Use multiple reinforcing cues for the same sensation.
- ✓ Test associations with the intended audience.

COMMON RISK

- ! Relying on one ambiguous symbol.
- ! Overloading every sense cue at equal intensity.

Source lens: tertiarycourses.com.sg · online.njit.edu

© Tertiary Infotech Academy Pte Ltd

PRACTITIONER CHECK

Ask viewers for three adjectives before revealing the brief.

Visual art can imply sound, touch, smell and temperature through learned associations.

Source lens: tertiarycourses.com.sg · online.njit.edu

© Tertiary Infotech Academy Pte Ltd

CONCEPT MODEL

Interrogate the design brief

1. **Audience**
   Who sees it, in what state and with what prior knowledge?

2. **Need**
   What problem or opportunity must the work address?

3. **Constraints**
   Format, accessibility, time, brand and production limits.

4. **Success**
   Observable criteria for comprehension and response.

Source lens: tertiarycourses.com.sg

© Tertiary Infotech Academy Pte Ltd

APPLY THE PRINCIPLE

Interrogate the design brief · choices

STRONG PRACTICE

- ✓ Rewrite vague adjectives as observable criteria.
- ✓ Separate non-negotiables from creative freedoms.

COMMON RISK

- ! Starting production before resolving contradictions.
- ! Treating all stakeholder requests as equal priorities.

Source lens: tertiarycourses.com.sg

© Tertiary Infotech Academy Pte Ltd

PRACTITIONER CHECK

Can another designer judge the outcome without asking what 'modern' means?

A useful brief connects audience, need, message, constraints and evidence of success.

Source lens: tertiarycourses.com.sg

© Tertiary Infotech Academy Pte Ltd

CONCEPT MODEL

Audience is a design variable

1. **Capability**
   Vision, dexterity, language and digital familiarity.

2. **Motivation**
   What the viewer wants or fears.

3. **Culture**
   Shared meanings, conventions and sensitivities.

4. **Environment**
   Screen, light, distance, distraction and time pressure.

Source lens: tertiarycourses.com.sg · 21-draw.com

© Tertiary Infotech Academy Pte Ltd

APPLY THE PRINCIPLE

Audience is a design variable · choices

STRONG PRACTICE

- ✓ Design for a real moment of use.
- ✓ Include edge cases during concept evaluation.

COMMON RISK

- ! Inventing a generic 'average user'.
- ! Assuming the creator's interpretation is obvious.

Source lens: tertiarycourses.com.sg · 21-draw.com

© Tertiary Infotech Academy Pte Ltd

PRACTITIONER CHECK

Who is excluded if the design is viewed quickly, outdoors or on a small screen?

The same visual can be inviting, confusing or inappropriate for different users and contexts.

Source lens: tertiarycourses.com.sg · 21-draw.com

© Tertiary Infotech Academy Pte Ltd

CONCEPT MODEL

Set an artistic intention

1. **Subject**
   What is depicted?

2. **Message**
   What should the viewer understand?

3. **Mood**
   What should the viewer feel?

4. **Action**
   What should happen next?

Source lens: tertiarycourses.com.sg · medium.com

© Tertiary Infotech Academy Pte Ltd

APPLY THE PRINCIPLE

Set an artistic intention · choices

STRONG PRACTICE

- ✓ Write one sentence before gathering references.
- ✓ Use the intention as a filter during critique.

COMMON RISK

- ! Collecting references without a question.
- ! Changing style whenever a new effect appears.

Source lens: tertiarycourses.com.sg · medium.com

© Tertiary Infotech Academy Pte Ltd

PRACTITIONER CHECK

Complete: 'For [audience], this work should make [idea] feel [emotion].'

A short intention statement keeps style, technique and content pulling in the same direction.

Source lens: tertiarycourses.com.sg · medium.com

© Tertiary Infotech Academy Pte Ltd

CONCEPT MODEL

Diverge before you converge

1. **Fluency**
   Generate many options quickly.

2. **Flexibility**
   Change viewpoint, metaphor, medium or mood.

3. **Selection**
   Compare options against explicit criteria.

4. **Combination**
   Merge the strongest features into a new direction.

Source lens: tertiarycourses.com.sg · wikihow.com

© Tertiary Infotech Academy Pte Ltd

APPLY THE PRINCIPLE

Diverge before you converge · choices

STRONG PRACTICE

- ✓ Set a time box and quantity target for thumbnails.
- ✓ Delay polish until a direction earns it.

COMMON RISK

- ! Rendering one idea too soon.
- ! Selecting only on personal excitement.

Source lens: tertiarycourses.com.sg · wikihow.com

© Tertiary Infotech Academy Pte Ltd

PRACTITIONER CHECK

If three thumbnails share the same composition, are they really alternatives?

Early variety prevents the first plausible idea from becoming the only idea.

Source lens: tertiarycourses.com.sg · wikihow.com

© Tertiary Infotech Academy Pte Ltd

CONCEPT MODEL

Thumbnail composition

1. **Focal point**
   One area claims first attention.
2. **Path**
   Shapes and contrast move the eye intentionally.
3. **Balance**
   Visual weight feels stable or deliberately tense.
4. **Space**
   Positive and negative shapes reinforce the message.

Source lens: online.njit.edu · 21-draw.com

© Tertiary Infotech Academy Pte Ltd

APPLY THE PRINCIPLE

Thumbnail composition · choices

STRONG PRACTICE

- ✓ Judge thumbnails at arm's length.
- ✓ Test crop, scale and value—not decoration.

COMMON RISK

- ! Using detail to rescue weak structure.
- ! Putting every important element at the centre.

Source lens: online.njit.edu · 21-draw.com

© Tertiary Infotech Academy Pte Ltd

PRACTITIONER CHECK

Squint: can you still see the focal hierarchy?

Small, fast studies reveal balance, hierarchy and movement before detail creates attachment.

Source lens: online.njit.edu · 21-draw.com

© Tertiary Infotech Academy Pte Ltd

CONCEPT MODEL

Mood boards are evidence boards

1. **Palette**
   A limited family tied to the intended mood.
2. **Form**
   Repeated shapes, proportions and edge qualities.
3. **Texture**
   Material and mark references.
4. **Exclusions**
   What the direction deliberately avoids.

Source lens: tertiarycourses.com.sg · creativebloq.com

© Tertiary Infotech Academy Pte Ltd

APPLY THE PRINCIPLE

Mood boards are evidence boards · choices

STRONG PRACTICE

- ✓ Annotate why each reference matters.
- ✓ Use rights-safe references and record sources.

COMMON RISK

- ! Copying a finished composition.
- ! Mixing incompatible styles without hierarchy.

Source lens: tertiarycourses.com.sg · creativebloq.com

© Tertiary Infotech Academy Pte Ltd

PRACTITIONER CHECK

Can every image be defended with a specific criterion from the brief?

A mood board should explain a design direction, not merely collect attractive pictures.

Source lens: tertiarycourses.com.sg · creativebloq.com

© Tertiary Infotech Academy Pte Ltd

CONCEPT MODEL

Visual hierarchy earns attention

1. **Primary**
   The one message or subject that must land first.
2. **Secondary**
   Support that explains or contextualises.
3. **Tertiary**
   Detail rewarded after comprehension.
4. **Quiet space**
   Rest that makes emphasis possible.

Source lens: online.njit.edu

© Tertiary Infotech Academy Pte Ltd

APPLY THE PRINCIPLE

Visual hierarchy earns attention · choices

STRONG PRACTICE

- ✓ Use contrast selectively where decisions matter.
- ✓ Reduce competing accents before adding a new one.

COMMON RISK

- ! Making every element bold and saturated.
- ! Confusing symmetry with clear hierarchy.

Source lens: online.njit.edu

© Tertiary Infotech Academy Pte Ltd

PRACTITIONER CHECK

Trace the first three eye fixations—do they follow the intended story?

Size, value, colour, placement, detail and isolation determine what viewers notice first.

Source lens: online.njit.edu

© Tertiary Infotech Academy Pte Ltd

CONCEPT MODEL

Choose a tool and canvas deliberately

1

Procreate

Deep brush engine, masks, guides, adjustments and advanced compositing.

2

Sketchbook Studio

Free iPad sketching with pressure brushes, layers, ruler, guides and filters.

3

Canvas

Pixel dimensions determine detail, layer capacity and output size.

4

Format

Working files preserve layers; PNG/JPEG/PDF serve delivery needs.

Source lens: apps.apple.com

© Tertiary Infotech Academy Pte Ltd

APPLY THE PRINCIPLE

Choose a tool and canvas deliberately · choices

STRONG PRACTICE

- ✓ Create to target dimensions and retain an editable master.
- ✓ Test both apps for equivalent artistic intent.

COMMON RISK

- ! Using a universal canvas size for every output.
- ! Flattening before the work is approved.

Source lens: apps.apple.com

© Tertiary Infotech Academy Pte Ltd

PRACTITIONER CHECK

What is the smallest file that preserves the evidence and future edits you need?

The app, canvas dimensions, colour profile and export format should follow the use case.

Source lens: apps.apple.com

© Tertiary Infotech Academy Pte Ltd

FOUNDATION · 45 MINUTES

Lab 01 · Mark-Making Studio

REAL-USE SCENARIO

A community arts centre needs a welcoming visual vocabulary for beginner workshop cards.

YOUR ROLE

Junior digital illustrator

DELIVERABLE

A labelled mark sheet with twelve pressure, speed and opacity variations.

TECHNIQUES

Canvas setup · stylus control · brush size · opacity · undo/redo

© Tertiary Infotech Academy Pte Ltd

Lab 01 · Acceptance & Debrief

1 **Evidence 1**
12 visibly different marks

2 **Evidence 2**
At least three pressure responses

3 **Evidence 3**
Readable grouping at fit-to-screen

4 **Evidence 4**
Layered working file plus PNG

© Tertiary Infotech Academy Pte Ltd

FOUNDATION · 60 MINUTES

Lab 02 · Observational Sketch: Café Object

REAL-USE SCENARIO

A neighbourhood café needs a hand-drawn icon of a ceramic cup and leaf for a seasonal menu.

YOUR ROLE

Editorial illustrator

DELIVERABLE

A clean observational sketch built from primitives, landmarks and negative space.

TECHNIQUES

Gesture · shape construction · proportion · line weight · reference overlay

© Tertiary Infotech Academy Pte Ltd

Lab 02 · Acceptance & Debrief

1

Evidence 1

Primitive construction remains visible on a separate layer

2

Evidence 2

Proportion checked using two landmarks

3

Evidence 3

Final line weight shows overlap

4

Evidence 4

Reference source recorded

© Tertiary Infotech Academy Pte Ltd

FOUNDATION · 60 MINUTES

Lab 03 · Brush and Texture Library

REAL-USE SCENARIO

A sustainable packaging studio wants a small repeatable texture kit for paper, ink and foliage.

YOUR ROLE

Surface-design assistant

DELIVERABLE

A brush specimen board and a reusable three-brush mini library.

TECHNIQUES

Brush families · pressure response · grain · spacing · texture

© Tertiary Infotech Academy Pte Ltd

K2 · K5 · LO1 · DISCUSS, DO NOT COPY STEPS

Lab 03 · Acceptance & Debrief

1

Evidence 1

Specimen board compares edge, opacity and grain

2

Evidence 2

Three brushes have distinct roles

3

Evidence 3

Texture remains subordinate to value

4

Evidence 4

Brush choices documented

© Tertiary Infotech Academy Pte Ltd

FOUNDATION · 75 MINUTES

Lab 04 · Mood Board from a Real Brief

REAL-USE SCENARIO

A wellness pop-up requests a calm but energetic launch illustration for working adults.

YOUR ROLE

Visual concept designer

DELIVERABLE

An annotated mood board, three thumbnails and one selected direction.

TECHNIQUES

Brief analysis · audience · sensory cues · palette · thumbnail composition

© Tertiary Infotech Academy Pte Ltd

K2 · K3 · A1 · LO1 · DISCUSS, DO NOT COPY STEPS

Lab 04 · Acceptance & Debrief

1. **Evidence 1**
   Every reference maps to a brief criterion
2. **Evidence 2**
   At least three genuinely different thumbnails
3. **Evidence 3**
   Palette has dominant/support/accent roles
4. **Evidence 4**
   Selection rationale names trade-offs

© Tertiary Infotech Academy Pte Ltd

TOPIC RECAP

Topic 1 · What You Can Now Do

1

Explain

From intent and sensory meaning to confident marks and viable concepts

2

Create

Apply the topic's concepts in a real-use lab deliverable.

3

Evaluate

Use evidence and acceptance criteria to improve the work.

4

Transfer

Repeat the intent in either Procreate or Sketchbook Studio.

© Tertiary Infotech Academy Pte Ltd

End-of-Day Studio Reset

Save the layered master · export evidence · back up your work

© Tertiary Infotech Academy Pte Ltd

02

TOPIC 2 · K4 · K5 · K9 · K10 · A2 · A3 · LO2

Digital Art Techniques and Principles

Brush, colour, form, layers, perspective and light as an integrated workflow

© Tertiary Infotech Academy Pte Ltd

CONCEPT MODEL

Attractiveness bias opens the door

1

First look

Polish creates a fast positive expectation.

2

Halo effect

One attractive cue can colour judgement of the whole.

3

Risk

Beauty may conceal poor legibility or weak function.

4

Responsibility

Pair appeal with honest, usable communication.

Source lens: tertiarycourses.com.sg

© Tertiary Infotech Academy Pte Ltd

APPLY THE PRINCIPLE

Attractiveness bias opens the door · choices

STRONG PRACTICE

- ✓ Use appeal to guide attention toward useful content.
- ✓ Validate comprehension after the first impression.

COMMON RISK

- ! Treating likes as proof of effectiveness.
- ! Making decoration compete with essential information.

Source lens: tertiarycourses.com.sg

© Tertiary Infotech Academy Pte Ltd

PRACTITIONER CHECK

After five seconds, can the viewer state both the mood and the purpose?

A visually appealing design gains attention and perceived ease, but usefulness must sustain trust.

Source lens: tertiarycourses.com.sg

© Tertiary Infotech Academy Pte Ltd

CONCEPT MODEL

Form follows function

1. **Purpose**
   Start from task and audience.
2. **Structure**
   Organise information around decisions.
3. **Affordance**
   Make interactive or instructional elements recognisable.
4. **Beauty**
   Use craft to strengthen—not replace—function.

Source lens: tertiarycourses.com.sg

© Tertiary Infotech Academy Pte Ltd

APPLY THE PRINCIPLE

Form follows function · choices

STRONG PRACTICE

- ✓ Preserve legibility under stylistic treatment.
- ✓ Make each prominent element earn its space.

COMMON RISK

- ! Using a fashionable form that blocks the task.
- ! Assuming functional means visually dull.

Source lens: tertiarycourses.com.sg

© Tertiary Infotech Academy Pte Ltd

PRACTITIONER CHECK

Remove one decorative element: does clarity improve with no loss of meaning?

The visual form should express and support what the artefact must do.

Source lens: tertiarycourses.com.sg

© Tertiary Infotech Academy Pte Ltd

CONCEPT MODEL

Line quality communicates character

1. **Weight**
   Thicker lines advance; thin lines recede or feel delicate.

2. **Taper**
   A controlled start and finish creates energy.

3. **Rhythm**
   Repeated changes make a line feel organic.

4. **Economy**
   Fewer decisive lines can explain more.

Source lens: procreate.com · 21-draw.com

© Tertiary Infotech Academy Pte Ltd

APPLY THE PRINCIPLE

Line quality communicates character · choices

STRONG PRACTICE

- ✓ Warm up with long shoulder-driven strokes.
- ✓ Vary weight according to light and overlap.

COMMON RISK

- ! Scratch-building edges with many short marks.
- ! Using identical weight around every form.

Source lens: procreate.com · 21-draw.com

© Tertiary Infotech Academy Pte Ltd

PRACTITIONER CHECK

Can the silhouette read before internal detail is added?

Pressure, speed, taper, rhythm and edge confidence change both form and feeling.

Source lens: procreate.com · 21-draw.com

© Tertiary Infotech Academy Pte Ltd

CONCEPT MODEL

Brushes are systems

1

Shape

The stamp that forms each stroke.

2

Grain

Texture dragged or rolled through the mark.

3

Dynamics

How pressure, tilt and speed alter the stroke.

4

Spacing

How individual stamps merge into a line.

Source lens: apps.apple.com · skillshare.com · creativebloq.com

© Tertiary Infotech Academy Pte Ltd

APPLY THE PRINCIPLE

Brushes are systems · choices

STRONG PRACTICE

- ✓ Build a small purpose-based brush set.
- ✓ Test each brush at multiple sizes and pressures.

COMMON RISK

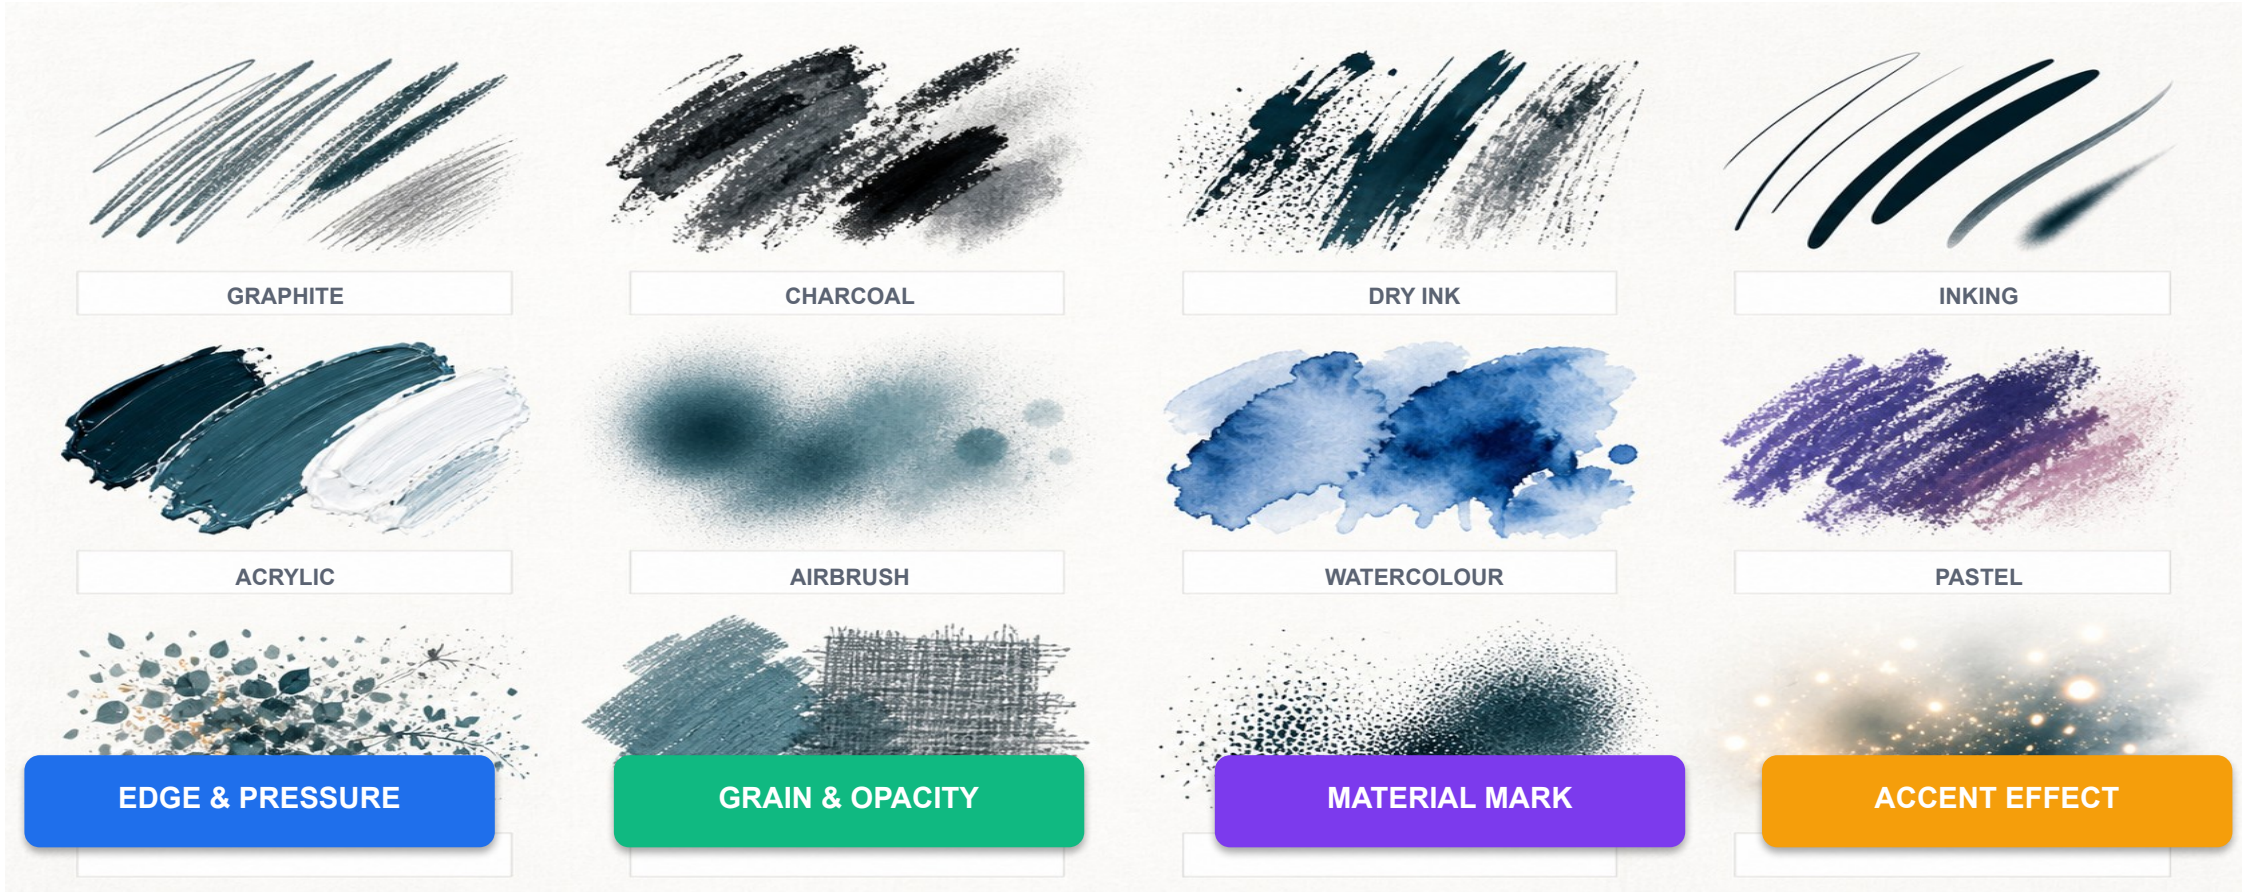

- ! Changing brushes to solve a value problem.
- ! Using texture before major forms are stable.

Source lens: apps.apple.com · skillshare.com · creativebloq.com

© Tertiary Infotech Academy Pte Ltd

VISUAL ANALYSIS

Brushes are systems · visual reading

Source lens: apps.apple.com · skillshare.com · creativebloq.com

© Tertiary Infotech Academy Pte Ltd

CONCEPT MODEL

Shape becomes form through value

1

Primitive

Reduce subjects to sphere, box, cylinder and cone.

2

Plane

Each plane faces light differently.

3

Core shadow

The turning point away from the light.

4

Cast shadow

The form blocks light onto another surface.

Source lens: online.njit.edu · aureolestudios.ca

© Tertiary Infotech Academy Pte Ltd

APPLY THE PRINCIPLE

Shape becomes form through value · choices

STRONG PRACTICE

- ✓ Block simple masses before surface detail.
- ✓ Keep one clear light direction.

COMMON RISK

- ! Blending every transition equally.
- ! Adding highlights without explaining the planes.

Source lens: online.njit.edu · aureolestudios.ca

© Tertiary Infotech Academy Pte Ltd

PRACTITIONER CHECK

Does the object still feel solid in greyscale?

A flat shape reads as volume when light and shadow describe its planes.

Source lens: online.njit.edu · aureolestudios.ca

© Tertiary Infotech Academy Pte Ltd

CONCEPT MODEL

Proportion creates believability

1

Envelope

Capture the outer height and width first.

2

Landmarks

Anchor major changes of direction.

3

Ratios

Compare one distance against another.

4

Negative space

Check the shapes around the subject.

Source lens: 21-draw.com · aureolestudios.ca

© Tertiary Infotech Academy Pte Ltd

APPLY THE PRINCIPLE

Proportion creates believability · choices

STRONG PRACTICE

- ✓ Measure relationships before refining contours.
- ✓ Flip the canvas to reveal drift.

COMMON RISK

- ! Correcting details before the whole.
- ! Scaling one feature without checking neighbours.

Source lens: 21-draw.com · aureolestudios.ca

© Tertiary Infotech Academy Pte Ltd

PRACTITIONER CHECK

Which two landmarks provide the fastest reliable proportion check?

Proportion is the relationship among parts; accuracy comes from comparison, not isolated measurement.

Source lens: 21-draw.com · aureolestudios.ca

© Tertiary Infotech Academy Pte Ltd

CONCEPT MODEL

Colour has three coordinates

1. **Hue**
   Position around the colour wheel.

2. **Saturation**
   Distance from neutral grey.

3. **Value**
   Relative lightness or darkness.

4. **Temperature**
   Perceived warm–cool relationship.

Source lens: online.njit.edu · tertiarycourses.com.sg

© Tertiary Infotech Academy Pte Ltd

APPLY THE PRINCIPLE

Colour has three coordinates · choices

STRONG PRACTICE

- ✓ Solve value structure before fine hue shifts.
- ✓ Reserve peak saturation for focal accents.

COMMON RISK

- ! Choosing colours only from the hue wheel.
- ! Using saturation to compensate for weak contrast.

Source lens: online.njit.edu · tertiarycourses.com.sg

© Tertiary Infotech Academy Pte Ltd

PRACTITIONER CHECK

Convert to greyscale: does the focal point remain clear?

Hue names the family; saturation controls intensity; value controls lightness and hierarchy.

Source lens: online.njit.edu · tertiarycourses.com.sg

© Tertiary Infotech Academy Pte Ltd

CONCEPT MODEL

Harmony is controlled relationship

1. **Analogous**
   Neighbouring hues create cohesion.

2. **Complementary**
   Opposites create energetic contrast.

3. **Split complementary**
   Contrast with more flexibility.

4. **Neutral bridge**
   Greys and muted colours make accents meaningful.

Source lens: online.njit.edu · tertiarycourses.com.sg

© Tertiary Infotech Academy Pte Ltd

APPLY THE PRINCIPLE

Harmony is controlled relationship · choices

STRONG PRACTICE

- ✓ Assign dominant, supporting and accent roles.
- ✓ Sample colours in context, not in isolation.

COMMON RISK

- ! Using equal amounts of every palette colour.
- ! Ignoring simultaneous contrast between neighbours.

Source lens: online.njit.edu · tertiarycourses.com.sg

© Tertiary Infotech Academy Pte Ltd

PRACTITIONER CHECK

If the accent colour spreads, does it stop functioning as an accent?

A palette feels coherent when colours share a logic and roles are deliberately limited.

Source lens: online.njit.edu · tertiarycourses.com.sg

© Tertiary Infotech Academy Pte Ltd

CONCEPT MODEL

Value organises the image

1. **Three-value plan**
   Light, mid and dark groups simplify decisions.

2. **Focal contrast**
   Largest local contrast attracts attention.

3. **Atmosphere**
   Distant values compress toward the environment.

4. **Readability**
   Key shapes separate from their background.

Source lens: online.njit.edu · aureolestudios.ca

© Tertiary Infotech Academy Pte Ltd

APPLY THE PRINCIPLE

Value organises the image · choices

STRONG PRACTICE

- ✓ Create a tiny greyscale study first.
- ✓ Group small variations into larger families.

COMMON RISK

- ! Rendering every local value independently.
- ! Placing the darkest dark in an accidental corner.

Source lens: online.njit.edu · aureolestudios.ca

© Tertiary Infotech Academy Pte Ltd

PRACTITIONER CHECK

At 10% zoom, which shapes merge and which remain distinct?

Value grouping determines readability before colour, detail or texture are perceived.

Source lens: online.njit.edu · aureolestudios.ca

© Tertiary Infotech Academy Pte Ltd

CONCEPT MODEL

Light is a spatial story

1. **Direction**
   Where light originates and which planes face it.

2. **Quality**
   Hard light creates crisp edges; soft light broad transitions.

3. **Colour**
   Light and environment tint surfaces.

4. **Bounce**
   Reflected light softens shadows without erasing them.

Source lens: online.njit.edu · creativebloq.com

© Tertiary Infotech Academy Pte Ltd

APPLY THE PRINCIPLE

Light is a spatial story · choices

STRONG PRACTICE

- ✓ Place the light source outside the canvas mentally.
- ✓ Use shadow shape to reinforce perspective.

COMMON RISK

- ! Adding random rim lights to every edge.
- ! Making shadows black regardless of environment.

Source lens: online.njit.edu · creativebloq.com

© Tertiary Infotech Academy Pte Ltd

PRACTITIONER CHECK

Can every highlight and cast shadow point back to the same source?

A consistent light source explains form, time, weather and emotional tone simultaneously.

Source lens: online.njit.edu · creativebloq.com

© Tertiary Infotech Academy Pte Ltd

CONCEPT MODEL

Layers separate decisions

1. **Structure**
   Sketch and guides remain editable.

2. **Colour**
   Flats isolate regions and simplify changes.

3. **Light**
   Shadow, highlights and atmosphere can be tuned independently.

4. **Finish**
   Texture and accents stay reversible.

Source lens: apps.apple.com · skillshare.com

© Tertiary Infotech Academy Pte Ltd

APPLY THE PRINCIPLE

Layers separate decisions · choices

STRONG PRACTICE

- ✓ Name layers by function and group related parts.
- ✓ Merge only after approval or duplication.

COMMON RISK

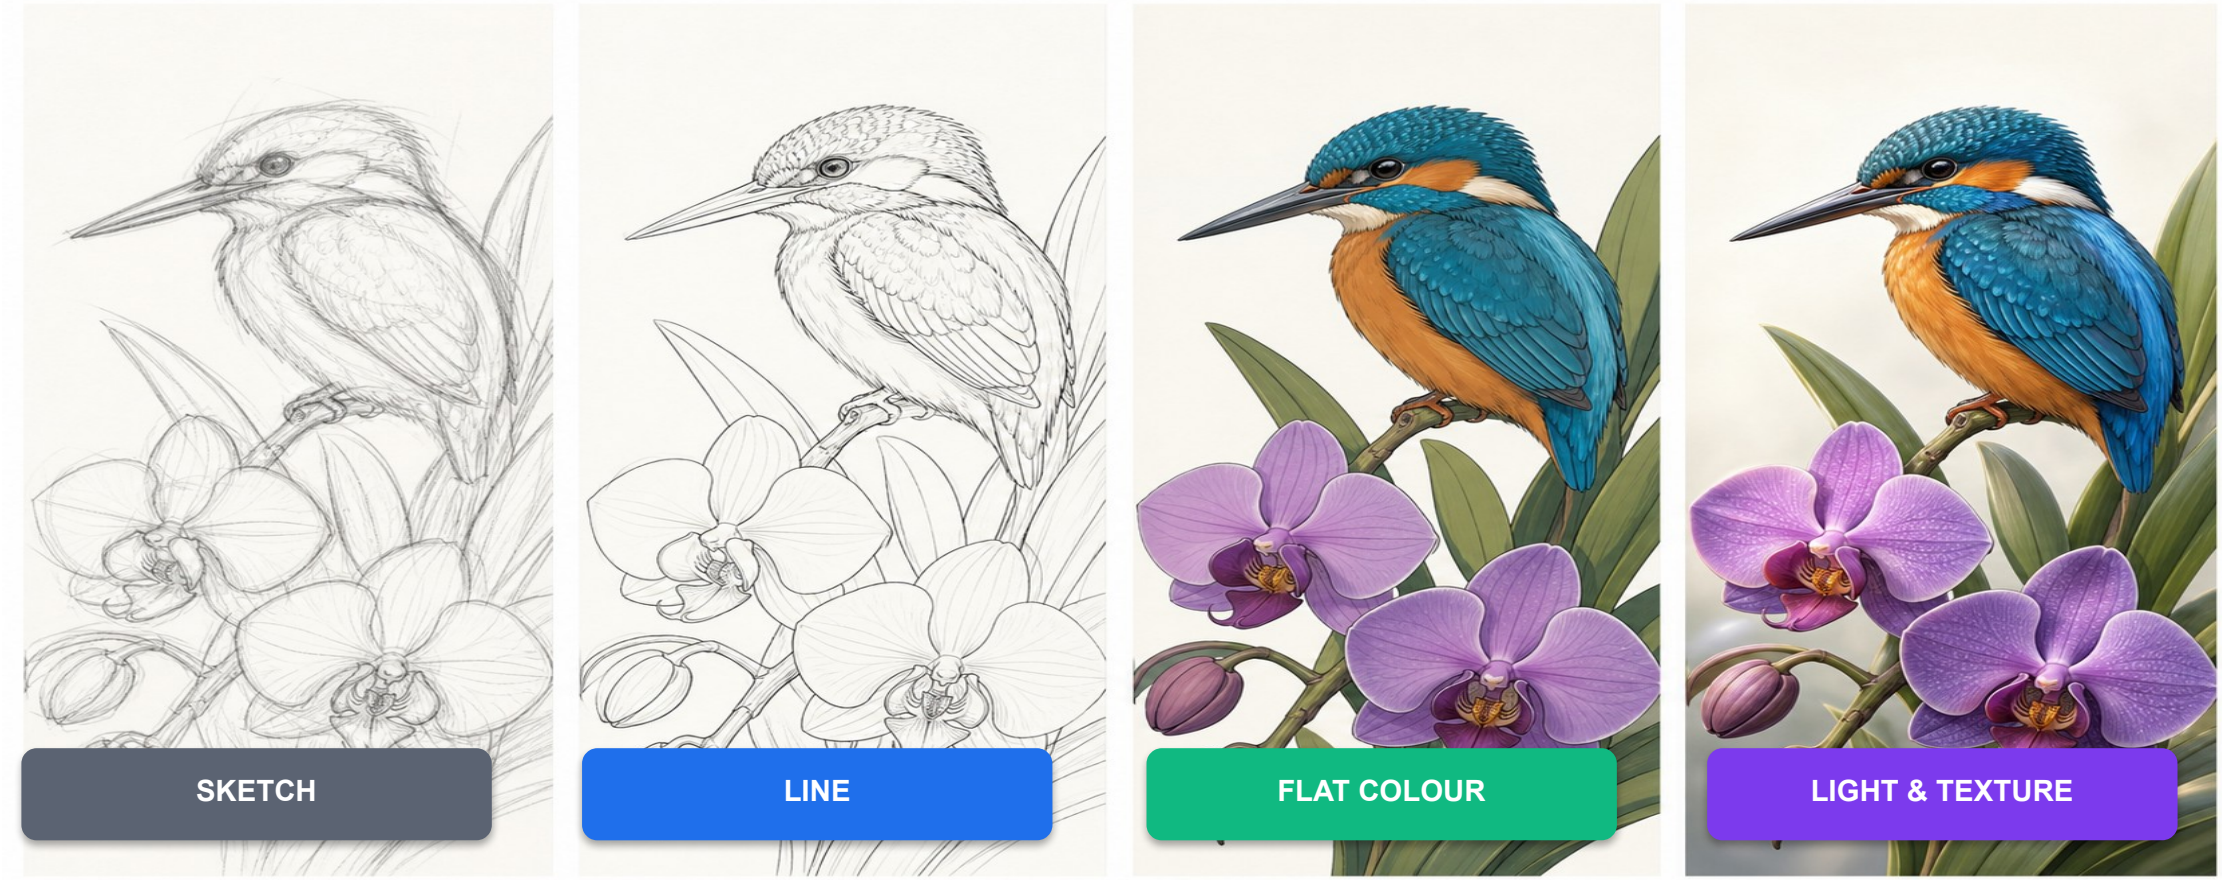

- ! Creating a layer for every tiny mark.
- ! Painting corrections onto the wrong layer.

Source lens: apps.apple.com · skillshare.com

© Tertiary Infotech Academy Pte Ltd

VISUAL ANALYSIS

Layers separate decisions · visual reading

Source lens: apps.apple.com · skillshare.com

© Tertiary Infotech Academy Pte Ltd

CONCEPT MODEL

Masks preserve options

1. **Alpha lock**
   Edit only existing opaque pixels on one layer.
2. **Clipping mask**
   A new layer uses the base layer's silhouette.
3. **Layer mask**
   Hide or reveal with greyscale information.
4. **Opacity**
   Tune an effect without repainting.

Source lens: apps.apple.com · creativebloq.com

© Tertiary Infotech Academy Pte Ltd

APPLY THE PRINCIPLE

Masks preserve options · choices

STRONG PRACTICE

- ✓ Use clipping for reversible texture and light.
- ✓ Duplicate before destructive adjustments.

COMMON RISK

- ! Erasing when a mask would preserve options.
- ! Stacking masks without naming their purpose.

Source lens: apps.apple.com · creativebloq.com

© Tertiary Infotech Academy Pte Ltd

PRACTITIONER CHECK

Can the change be reduced, recoloured or removed in seconds?

Alpha lock, clipping masks and layer masks constrain paint without permanently erasing source pixels.

Source lens: apps.apple.com · creativebloq.com

© Tertiary Infotech Academy Pte Ltd

CONCEPT MODEL

Selection and transform refine structure

1

Select

Freehand, automatic, rectangle or ellipse isolates an area.

2

Move

Reposition while maintaining layer relationships.

3

Scale

Uniform scaling protects proportion.

4

Warp

Local adjustment can clarify gesture but may degrade edges.

Source lens: procreate.com · skillshare.com

© Tertiary Infotech Academy Pte Ltd

APPLY THE PRINCIPLE

Selection and transform refine structure · choices

STRONG PRACTICE

- ✓ Transform early, before high-frequency detail.
- ✓ Check interpolation and edge quality after scaling.

COMMON RISK

- ! Repeatedly resizing raster content.
- ! Using warp to avoid redrawing a structural error.

Source lens: procreate.com · skillshare.com

© Tertiary Infotech Academy Pte Ltd

PRACTITIONER CHECK

Does the edit improve the whole composition, not just the selected part?

Selections isolate intent; transforms change scale, rotation, position and distortion.

Source lens: procreate.com · skillshare.com

© Tertiary Infotech Academy Pte Ltd

CONCEPT MODEL

Perspective makes space credible

1 **Horizon**
The viewer's eye level.

2 **One-point**
Depth lines converge to one point.

3 **Two-point**
Two horizontal axes converge separately.

4 **Three-point**
Verticals also converge for dramatic height.

Source lens: apps.apple.com · 21-draw.com

© Tertiary Infotech Academy Pte Ltd

APPLY THE PRINCIPLE

Perspective makes space credible · choices

STRONG PRACTICE

- ✓ Establish horizon and large boxes before detail.
- ✓ Use guides as scaffolding, not visible decoration.

COMMON RISK

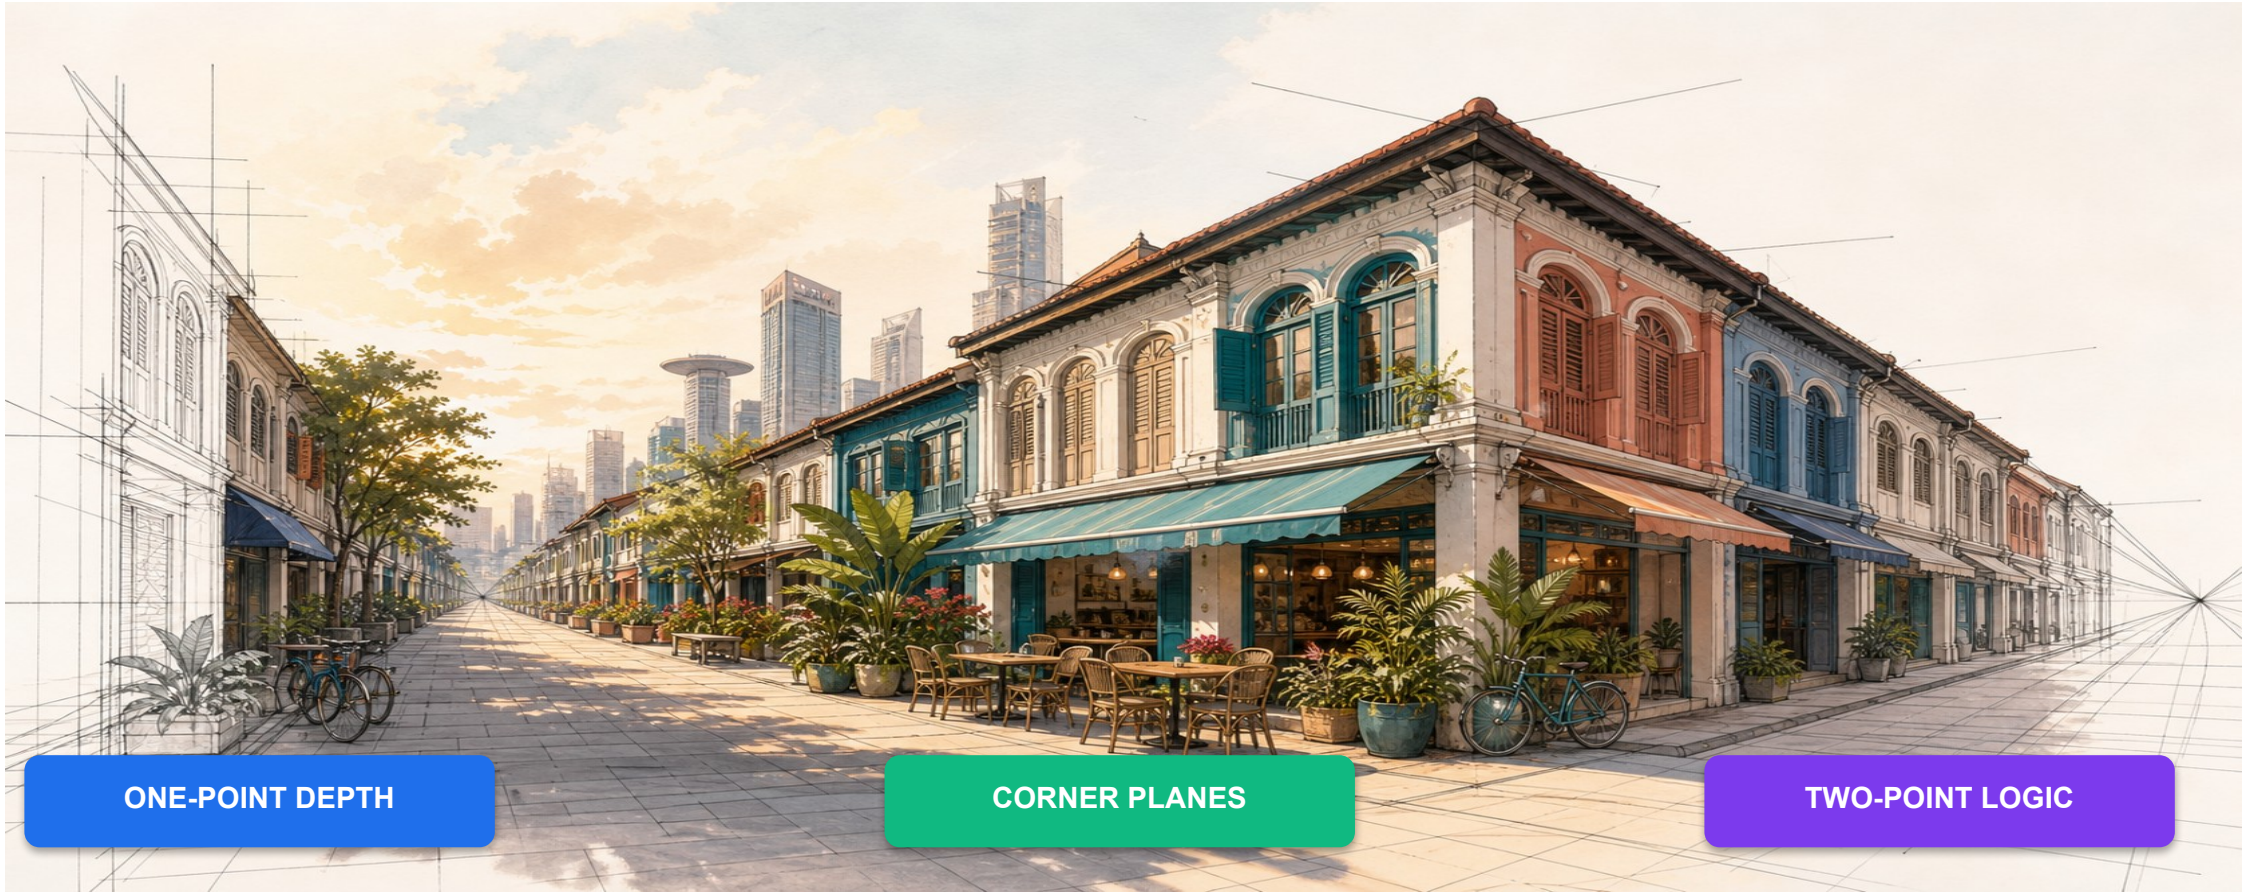

- ! Assigning each object its own horizon.
- ! Forcing curves without first constructing boxes.

Source lens: apps.apple.com · 21-draw.com

© Tertiary Infotech Academy Pte Ltd

VISUAL ANALYSIS

Perspective makes space credible · visual reading

Source lens: apps.apple.com · 21-draw.com

© Tertiary Infotech Academy Pte Ltd

CONCEPT MODEL

Depth uses multiple cues

1. **Overlap**
   Near forms interrupt far forms.

2. **Scale**
   Similar objects shrink with distance.

3. **Detail**
   Texture frequency reduces into depth.

4. **Atmosphere**
   Distant contrast and saturation compress.

Source lens: 21-draw.com · online.njit.edu

© Tertiary Infotech Academy Pte Ltd

APPLY THE PRINCIPLE

Depth uses multiple cues · choices

STRONG PRACTICE

- ✓ Combine at least three depth cues.
- ✓ Keep foreground edges and contrast purposeful.

COMMON RISK

- ! Making every plane equally sharp.
- ! Using blur where scale and overlap are wrong.

Source lens: 21-draw.com · online.njit.edu

© Tertiary Infotech Academy Pte Ltd

PRACTITIONER CHECK

Cover the perspective lines: does the scene still feel deep?

Perspective is reinforced by overlap, scale, placement, detail, edge and atmospheric contrast.

Source lens: 21-draw.com · online.njit.edu

© Tertiary Infotech Academy Pte Ltd

CONCEPT MODEL

Overlays and blend modes shape atmosphere

1. **Multiply**
   Darkens; useful for transparent shadow colour.

2. **Screen/Add**
   Lightens; useful for glow and reflected light.

3. **Overlay/Soft Light**
   Modulates contrast and colour.

4. **Opacity**
   Controls strength; subtlety preserves material identity.

Source lens: apps.apple.com · skillshare.com · creativebloq.com

© Tertiary Infotech Academy Pte Ltd

APPLY THE PRINCIPLE

Overlays and blend modes shape atmosphere · choices

STRONG PRACTICE

- ✓ Paint effects on named, separate layers.
- ✓ Compare before/after at fit-to-screen size.

COMMON RISK

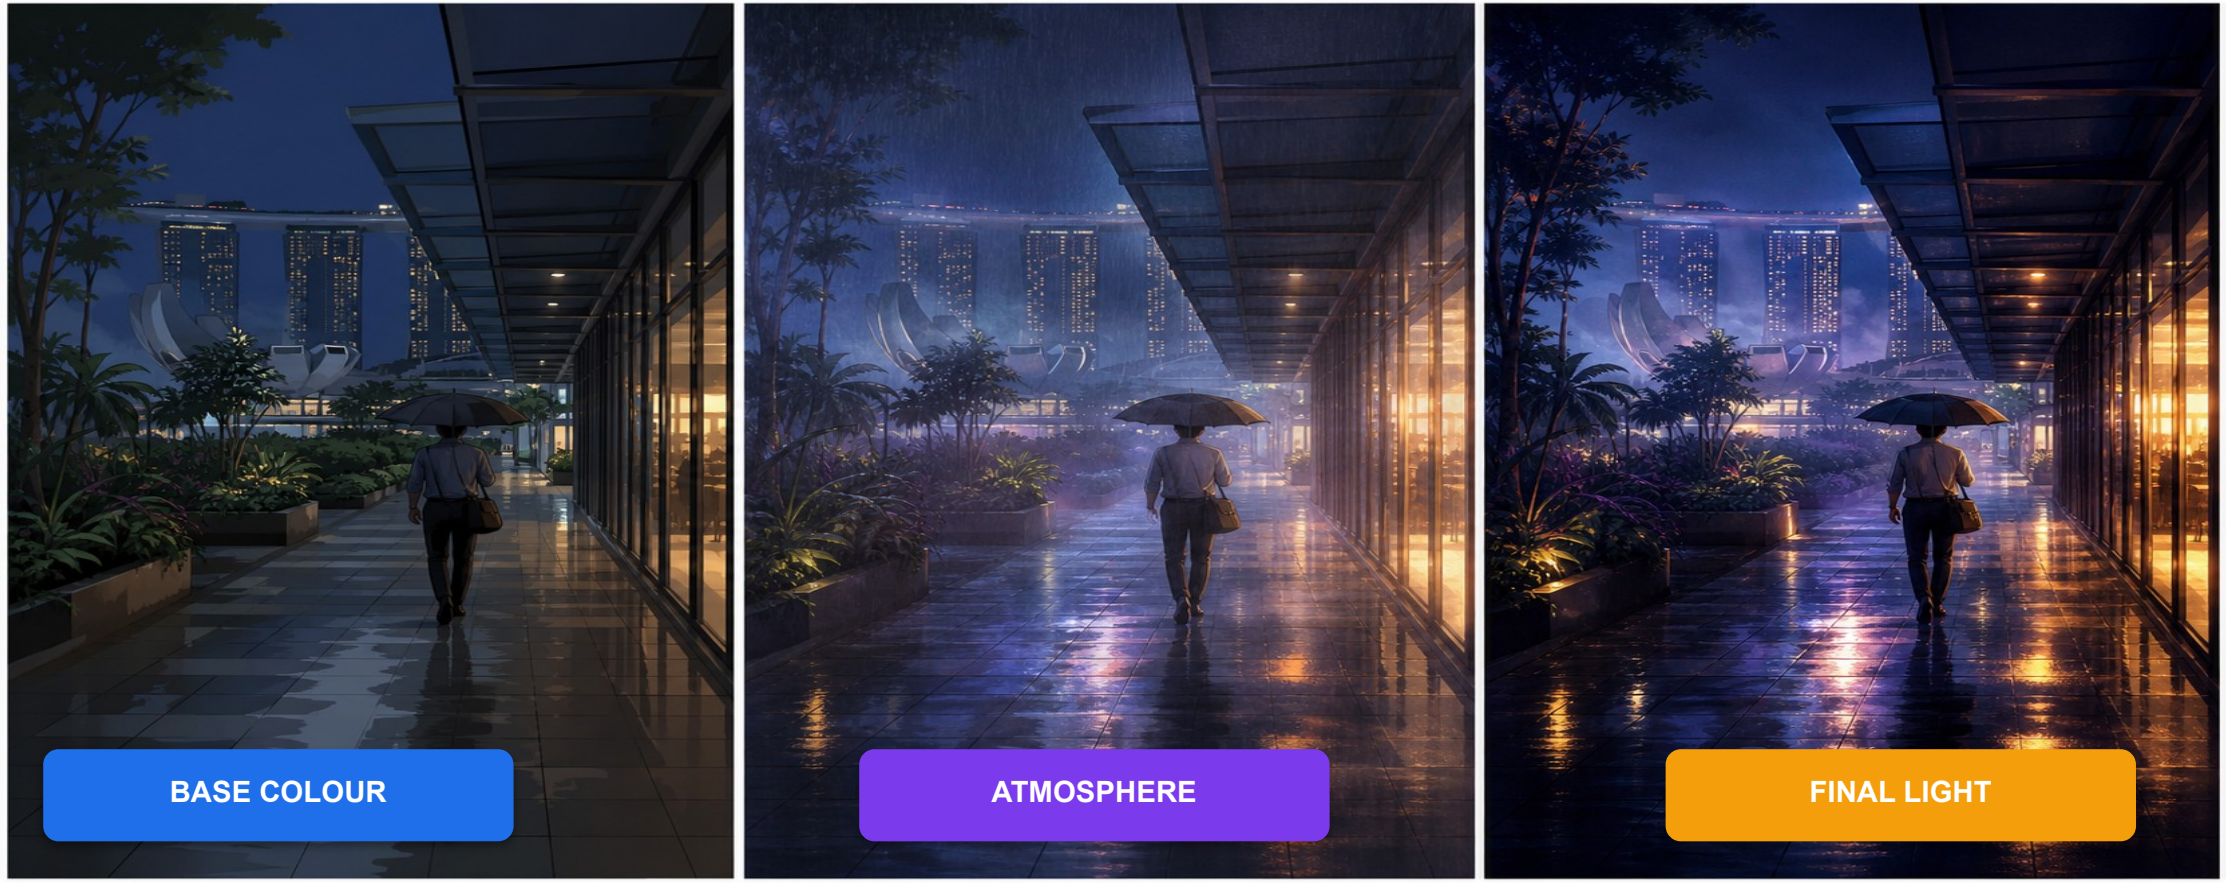

- ! Using blend modes as random filters.
- ! Letting atmosphere erase focal clarity.

Source lens: apps.apple.com · skillshare.com · creativebloq.com

© Tertiary Infotech Academy Pte Ltd

VISUAL ANALYSIS

Overlays reshape atmosphere · visual reading

Source lens: apps.apple.com · skillshare.com · creativebloq.com

© Tertiary Infotech Academy Pte Ltd

INTERMEDIATE · 75 MINUTES

Lab 05 · Layered Colour Illustration

REAL-USE SCENARIO

A nature education campaign needs a kingfisher-and-orchid illustration that can be recoloured for different seasons.

YOUR ROLE

Campaign illustrator

DELIVERABLE

A sketch-to-finish illustration with separate line, flat colour, light and texture layers.

TECHNIQUES

Layers · alpha lock or locked layers · clipping logic · flat colour · non-destructive edits

© Tertiary Infotech Academy Pte Ltd

K5 · K9 · A2 · LO2 · DISCUSS, DO NOT COPY STEPS

Lab 05 · Acceptance & Debrief

1 **Evidence 1**
Layer names reveal purpose

2 **Evidence 2**
Line, colour and light can be edited independently

3 **Evidence 3**
Palette remains coherent

4 **Evidence 4**
Before/after states exported

© Tertiary Infotech Academy Pte Ltd

INTERMEDIATE · 60 MINUTES

Lab 06 · Colour Harmony Poster

REAL-USE SCENARIO

A local café needs three colourways for the same illustrated seasonal-drink poster.

YOUR ROLE

Brand illustrator

DELIVERABLE

Analogous, complementary and muted palette variants of one composition.

TECHNIQUES

Hue · saturation · value · harmony · palette roles · greyscale check

© Tertiary Infotech Academy Pte Ltd

K9 · A2 · A3 · LO2 · DISCUSS, DO NOT COPY STEPS

Lab 06 · Acceptance & Debrief

1. **Evidence 1**
   Three variants retain the same composition

2. **Evidence 2**
   Primary message survives greyscale

3. **Evidence 3**
   Accent colour is used selectively

4. **Evidence 4**
   Recommended palette justified for the audience

© Tertiary Infotech Academy Pte Ltd

INTERMEDIATE · 75 MINUTES

Lab 07 · Form, Value and Light Study

REAL-USE SCENARIO

A ceramics maker needs a persuasive digital study of a new cup before a photo shoot.

YOUR ROLE

Product visualisation artist

DELIVERABLE

A rendered ceramic cup using primitives, a three-value plan and consistent light.

TECHNIQUES

Primitive construction · proportion · core/cast shadow · reflected light · material edges

© Tertiary Infotech Academy Pte Ltd

K10 · A2 · A3 · LO2 · DISCUSS, DO NOT COPY STEPS

Lab 07 · Acceptance & Debrief

1

Evidence 1

Cup reads as a stable 3D form

2

Evidence 2

Single light direction is consistent

3

Evidence 3

Cast shadow supports placement

4

Evidence 4

Material reads as ceramic without a texture stamp

© Tertiary Infotech Academy Pte Ltd

INTERMEDIATE · 75 MINUTES

Lab 08 · One-Point Perspective: Pop-up Aisle

REAL-USE SCENARIO

An arts retailer needs a concept sketch of a compact pop-up aisle viewed from its entrance.

YOUR ROLE

Environment concept artist

DELIVERABLE

A one-point perspective interior with shelves, signs and three depth cues.

TECHNIQUES

Horizon · vanishing point · drawing guide or ruler · scale recession · overlap

© Tertiary Infotech Academy Pte Ltd

Lab 08 · Acceptance & Debrief

1 **Evidence 1**
Depth edges converge consistently

2 **Evidence 2**
Viewer eye level is deliberate

3 **Evidence 3**
Objects scale convincingly

4 **Evidence 4**
Guide layer can be hidden without losing depth

© Tertiary Infotech Academy Pte Ltd

INTERMEDIATE · 90 MINUTES

Lab 09 · Two-Point Perspective: Shophouse Corner

REAL-USE SCENARIO

A heritage trail needs an original corner-building illustration that feels recognisably local without copying a specific property.

YOUR ROLE

Urban illustrator

DELIVERABLE

A two-point shophouse scene with a clean structural pass and coloured atmosphere.

TECHNIQUES

Two vanishing points · boxes to architecture · scale · line economy · local reference ethics

© Tertiary Infotech Academy Pte Ltd

Lab 09 · Acceptance & Debrief

1 **Evidence 1**
Two horizontal axes converge separately

2 **Evidence 2**
Verticals remain consistent

3 **Evidence 3**
Facade details follow planes

4 **Evidence 4**
Source references and transformations recorded

© Tertiary Infotech Academy Pte Ltd

ADVANCED · 75 MINUTES

Lab 10 · Overlay and Atmosphere

REAL-USE SCENARIO

A transport campaign needs a rainy-evening key visual that remains readable on digital signage.

YOUR ROLE

Key visual artist

DELIVERABLE

Base, overlay and final versions of one rainy-night scene.

TECHNIQUES

Blend modes · opacity · rain/mist overlays · colour temperature · reflected light

© Tertiary Infotech Academy Pte Ltd

K5 · K9 · A2 · A3 · LO2 · DISCUSS, DO NOT COPY STEPS

Lab 10 · Acceptance & Debrief

1. **Evidence 1**
   Every overlay has a named physical purpose
2. **Evidence 2**
   Subject remains readable at distance
3. **Evidence 3**
   Warm/cool contrast supports focus
4. **Evidence 4**
   Before/after comparison shows controlled—not global—change

© Tertiary Infotech Academy Pte Ltd

TOPIC RECAP

Topic 2 · What You Can Now Do

1

Explain

Brush, colour, form, layers, perspective and light as an integrated workflow

2

Create

Apply the topic's concepts in a real-use lab deliverable.

3

Evaluate

Use evidence and acceptance criteria to improve the work.

4

Transfer

Repeat the intent in either Procreate or Sketchbook Studio.

© Tertiary Infotech Academy Pte Ltd

End-of-Day Studio Reset

Save the layered master · export evidence · back up your work

© Tertiary Infotech Academy Pte Ltd

03

TOPIC 3 · K6 · K7 · K8 · A4 · A5 · LO3

Review and Enhancement of Digital Art

Critique, emotion, human factors and responsible refinement

© Tertiary Infotech Academy Pte Ltd

CONCEPT MODEL

Good design is fit for purpose

1. **Useful**
   Solves the intended problem.

2. **Understandable**
   Communicates without avoidable friction.

3. **Coherent**
   Parts share a visual logic.

4. **Responsible**
   Respects people, rights and resources.

Source lens: tertiarycourses.com.sg

© Tertiary Infotech Academy Pte Ltd

APPLY THE PRINCIPLE

Good design is fit for purpose · choices

STRONG PRACTICE

- ✓ Evaluate against the brief and evidence.
- ✓ Distinguish preference from performance.

COMMON RISK

- ! Calling a design good because it is polished.
- ! Ignoring who cannot use or interpret it.

Source lens: tertiarycourses.com.sg

© Tertiary Infotech Academy Pte Ltd

PRACTITIONER CHECK

Which success criterion would still fail if the work won an aesthetics award?

Quality is the interaction of usefulness, clarity, coherence, craft and responsible impact.

Source lens: tertiarycourses.com.sg

© Tertiary Infotech Academy Pte Ltd

CONCEPT MODEL

Critique the work, not the person

1. **Observe**
   State what is visible without judgement.
2. **Interpret**
   Explain the likely viewer effect.
3. **Connect**
   Relate the effect to the brief or principle.
4. **Propose**
   Recommend a specific change and validation.

Source lens: creativebloq.com · medium.com

© Tertiary Infotech Academy Pte Ltd

APPLY THE PRINCIPLE

Critique the work, not the person · choices

STRONG PRACTICE

- ✓ Use 'because' to connect evidence and impact.
- ✓ Invite the creator to restate the intention.

COMMON RISK

- ! Giving taste-only feedback such as 'make it pop'.
- ! Redesigning the work in the critic's style.

Source lens: creativebloq.com · medium.com

© Tertiary Infotech Academy Pte Ltd

PRACTITIONER CHECK

Could the creator act on the feedback without guessing?

A productive critique describes evidence, interprets impact and proposes a testable change.

Source lens: creativebloq.com · medium.com

© Tertiary Infotech Academy Pte Ltd

CONCEPT MODEL

Feedback needs a decision rule

1. **User evidence**
   Observed comprehension or emotional response.

2. **Expert review**
   Principle-based diagnosis.

3. **Stakeholder constraint**
   Business, brand or production requirement.

4. **Preference**
   Subjective taste; useful but not automatically decisive.

Source lens: creativebloq.com

© Tertiary Infotech Academy Pte Ltd

APPLY THE PRINCIPLE

Feedback needs a decision rule · choices

STRONG PRACTICE

- ✓ Prioritise comments that affect success criteria.
- ✓ Test high-impact disagreements with users.

COMMON RISK

- ! Averaging incompatible suggestions.
- ! Accepting seniority as a substitute for evidence.

Source lens: creativebloq.com

© Tertiary Infotech Academy Pte Ltd

PRACTITIONER CHECK

What evidence would change this design decision?

Conflicting feedback becomes manageable when comments are sorted by source, evidence and goal.

Source lens: creativebloq.com

© Tertiary Infotech Academy Pte Ltd

CONCEPT MODEL

Emotional design works on three levels

1. **Visceral**
   First sensory impression—colour, form, texture and motion.
2. **Behavioural**
   Pleasure and confidence during use.
3. **Reflective**
   Identity, memory and values after use.
4. **Alignment**
   All three should support the intended association.

Source lens: tertiarycourses.com.sg

© Tertiary Infotech Academy Pte Ltd

APPLY THE PRINCIPLE

Emotional design works on three levels · choices

STRONG PRACTICE

- ✓ Pair mood with a usable interaction or message.
- ✓ Choose symbolism that the audience can decode.

COMMON RISK

- ! Manipulating emotion to disguise poor function.
- ! Assuming one colour has one universal meaning.

Source lens: tertiarycourses.com.sg

© Tertiary Infotech Academy Pte Ltd

PRACTITIONER CHECK

What will the viewer feel immediately, during use and afterward?

Immediate appearance, ease of use and personal meaning combine to form the emotional experience.

Source lens: tertiarycourses.com.sg

© Tertiary Infotech Academy Pte Ltd

CONCEPT MODEL

Narrative creates association

1. **Character**
   A subject with a goal or state.
2. **Setting**
   Context that constrains interpretation.
3. **Tension**
   A gap, question or contrast.
4. **Change**
   Evidence that the moment belongs to a larger sequence.

Source lens: creativebloq.com · 21-draw.com

© Tertiary Infotech Academy Pte Ltd

APPLY THE PRINCIPLE

Narrative creates association · choices

STRONG PRACTICE

- ✓ Use pose, lighting and props to reinforce one story.
- ✓ Remove details that introduce a competing narrative.

COMMON RISK

- ! Explaining everything literally.
- ! Adding symbols with no audience relevance.

Source lens: creativebloq.com · 21-draw.com

© Tertiary Infotech Academy Pte Ltd

PRACTITIONER CHECK

What happened five seconds before this image?

A single image can imply what happened before, what matters now and what may happen next.

Source lens: creativebloq.com · 21-draw.com

© Tertiary Infotech Academy Pte Ltd

CONCEPT MODEL

Human factors begin with bodies

1. **Ergonomics**
   Neutral wrist, supported posture and regular movement.
2. **Vision**
   Scale, contrast and colour discrimination vary.
3. **Motor control**
   Touch targets and gestures need tolerance.
4. **Cognition**
   Working memory and attention are limited.

Source lens: 21-draw.com · tertiarycourses.com.sg

© Tertiary Infotech Academy Pte Ltd

APPLY THE PRINCIPLE

Human factors begin with bodies · choices

STRONG PRACTICE

- ✓ Zoom instead of hunching for fine detail.
- ✓ Schedule micro-breaks and alternate precision tasks.

COMMON RISK

- ! Treating discomfort as part of artistic discipline.
- ! Designing at one zoom level only.

Source lens: 21-draw.com · tertiarycourses.com.sg

© Tertiary Infotech Academy Pte Ltd

PRACTITIONER CHECK

Can the work be made and understood without unnecessary physical or cognitive strain?

Grip, posture, reach, vision and sustained attention affect both the making and viewing of digital art.

Source lens: 21-draw.com · tertiarycourses.com.sg

© Tertiary Infotech Academy Pte Ltd

CONCEPT MODEL

Accessibility strengthens visual communication

1. **Contrast**
   Critical information separates from its background.

2. **Colour independence**
   Meaning is not encoded by hue alone.

3. **Scale**
   Important details survive realistic viewing conditions.

4. **Simplicity**
   Sensory load is managed through hierarchy and space.

Source lens: apps.apple.com · tertiarycourses.com.sg

© Tertiary Infotech Academy Pte Ltd

APPLY THE PRINCIPLE

Accessibility strengthens visual communication · choices

STRONG PRACTICE

- ✓ Test in greyscale and at reduced size.
- ✓ Pair colour with shape, pattern or position.

COMMON RISK

- ! Using low contrast to appear sophisticated.
- ! Assuming accessibility applies only to text.

Source lens: apps.apple.com · tertiarycourses.com.sg

© Tertiary Infotech Academy Pte Ltd

PRACTITIONER CHECK

What essential meaning disappears for a colour-blind or low-vision viewer?

Contrast, hierarchy, colour independence and readable detail help more people without reducing artistry.

Source lens: apps.apple.com · tertiarycourses.com.sg

© Tertiary Infotech Academy Pte Ltd

CONCEPT MODEL

Sustainable design is lifecycle thinking

1

Efficient files

Right-size canvases and exports for the real need.

2

Reusability

Organised masters reduce repeated labour.

3

Longevity

Avoid trend-only choices when work must endure.

4

Production

Consider ink, substrate, energy and disposal when printed.

Source lens: tertiarycourses.com.sg

© Tertiary Infotech Academy Pte Ltd

APPLY THE PRINCIPLE

Sustainable design is lifecycle thinking · choices

STRONG PRACTICE

- ✓ Archive an editable master and deliver optimised copies.
- ✓ Design modular assets that can be reused.

COMMON RISK

- ! Saving every iteration at maximum size forever.
- ! Claiming digital output has no environmental cost.

Source lens: tertiarycourses.com.sg

© Tertiary Infotech Academy Pte Ltd

PRACTITIONER CHECK

What resources does this design consume across creation, delivery and reuse?

Digital creation still consumes device, storage, transfer and production resources.

Source lens: tertiarycourses.com.sg

© Tertiary Infotech Academy Pte Ltd

CONCEPT MODEL

Refinement protects the focal hierarchy

1. **Edges**
   Sharp where attention is needed; soft where forms turn or recede.

2. **Contrast**
   Peak light-dark difference belongs near the focal area.

3. **Detail**
   Highest frequency supports meaning.

4. **Cleanup**
   Tangencies and accidental marks are removed.

Source lens: creativebloq.com · aureolestudios.ca

© Tertiary Infotech Academy Pte Ltd

APPLY THE PRINCIPLE

Refinement protects the focal hierarchy · choices

STRONG PRACTICE

- ✓ Refine from large relationships to small accents.
- ✓ Stop when extra detail no longer improves the brief.

COMMON RISK

- ! Rendering every corner to the same finish.
- ! Adding effects to avoid resolving composition.

Source lens: creativebloq.com · aureolestudios.ca

© Tertiary Infotech Academy Pte Ltd

PRACTITIONER CHECK

If 20% of the detail were removed, would the message become clearer?

Finishing is selective clarification, not equal detail everywhere.

Source lens: creativebloq.com · aureolestudios.ca

© Tertiary Infotech Academy Pte Ltd

CONCEPT MODEL

Texture must describe material

1. **Scale**
   Grain size changes with distance.

2. **Direction**
   Marks wrap around form and flow.

3. **Value**
   Texture variation stays subordinate to lighting.

4. **Edge**
   Material properties influence softness and breakup.

Source lens: skillshare.com · creativebloq.com

© Tertiary Infotech Academy Pte Ltd

APPLY THE PRINCIPLE

Texture must describe material · choices

STRONG PRACTICE

- ✓ Sample texture at final viewing size.
- ✓ Use texture to distinguish materials, not fill emptiness.

COMMON RISK

- ! Stamping the same texture across every plane.
- ! Letting high-frequency noise flatten the form.

Source lens: skillshare.com · creativebloq.com

© Tertiary Infotech Academy Pte Ltd

PRACTITIONER CHECK

Could the viewer identify the material without colour?

Texture is persuasive when scale, direction, value and edge behaviour match the surface.

Source lens: skillshare.com · creativebloq.com

© Tertiary Infotech Academy Pte Ltd

CONCEPT MODEL

Iteration is a controlled experiment

1. **Baseline**
   Preserve the current approved state.
2. **Hypothesis**
   Predict what a change should improve.
3. **Variant**
   Change one major variable at a time.
4. **Review**
   Compare evidence and record the decision.

Source lens: medium.com · creativebloq.com

© Tertiary Infotech Academy Pte Ltd

APPLY THE PRINCIPLE

Iteration is a controlled experiment · choices

STRONG PRACTICE

- ✓ Duplicate before a major change and label versions.
- ✓ Keep a short decision log.

COMMON RISK

- ! Making many simultaneous changes.
- ! Saving files as final-final-really-final.

Source lens: medium.com · creativebloq.com

© Tertiary Infotech Academy Pte Ltd

PRACTITIONER CHECK

What did this version test, and what did you learn?

Versions are valuable when each one tests a clear hypothesis against the brief.

Source lens: medium.com · creativebloq.com

© Tertiary Infotech Academy Pte Ltd

CONCEPT MODEL

Export is part of design

1. **Editable master**
   Layered Procreate or working file for future change.
2. **PNG**
   Lossless graphics and transparency.
3. **JPEG**
   Compact continuous-tone images without transparency.
4. **PDF**
   Portable review or print delivery when appropriate.

Source lens: apps.apple.com

© Tertiary Infotech Academy Pte Ltd

APPLY THE PRINCIPLE

Export is part of design · choices

STRONG PRACTICE

- ✓ Name files with project, purpose and version.
- ✓ Inspect the exported file on the target device.

COMMON RISK

- ! Using screenshots as final exports.
- ! Discarding the layered master after approval.

Source lens: apps.apple.com

© Tertiary Infotech Academy Pte Ltd

PRACTITIONER CHECK

Can the recipient identify the current file and use it without asking questions?

A strong artwork can fail if colour, transparency, dimensions or compression do not match delivery.

Source lens: apps.apple.com

© Tertiary Infotech Academy Pte Ltd

CONCEPT MODEL

Originality requires ethical references

1. **Source**
   Record creator, licence and link.

2. **Transform**
   Combine references and make new decisions.

3. **Permission**
   Use owned, licensed or clearly permitted material.

4. **Disclosure**
   Label generated or composited concept visuals when relevant.

Source lens: wikihow.com · medium.com

© Tertiary Infotech Academy Pte Ltd

APPLY THE PRINCIPLE

Originality requires ethical references · choices

STRONG PRACTICE

- ✓ Build a reference set from multiple sources.
- ✓ Keep provenance with the project file.

COMMON RISK

- ! Tracing protected work for a commercial output.
- ! Presenting generated imagery as documentary evidence.

Source lens: wikihow.com · medium.com

© Tertiary Infotech Academy Pte Ltd

PRACTITIONER CHECK

Could you explain the origin and transformation of every major element?

References support observation and accuracy; they do not grant permission to copy composition or style identity.

Source lens: wikihow.com · medium.com

© Tertiary Infotech Academy Pte Ltd

ADVANCED · 75 MINUTES

Lab 11 · Critique and Accessibility Sprint

REAL-USE SCENARIO

A boutique hotel has a beautiful handwashing poster, but guests miss key instructions and report visual overload.

YOUR ROLE

Design reviewer

DELIVERABLE

An evidence-based critique, annotated revision plan and improved draft.

TECHNIQUES

Observe–interpret–connect–propose · hierarchy · contrast · colour independence · sensory load

© Tertiary Infotech Academy Pte Ltd

K4 · K6 · K7 · K8 · A1 · A4 · LO3 · DISCUSS, DO NOT COPY STEPS

Lab 11 · Acceptance & Debrief

1

Evidence 1

At least five observations are evidence-based

2

Evidence 2

Every proposed change maps to function or sensory appeal

3

Evidence 3

Meaning survives greyscale and thumbnail checks

4

Evidence 4

Revision keeps a credible luxury association

© Tertiary Infotech Academy Pte Ltd

ADVANCED · 120 MINUTES

Lab 12 · Capstone: Luxury Hotel Handwashing Poster

REAL-USE SCENARIO

A Singapore luxury hotel commissions an elegant, inclusive handwashing poster for guest washrooms.

YOUR ROLE

Lead digital artist

DELIVERABLE

A4 portrait poster, working file, exported PNG/PDF, critique record and five-decision rationale.

TECHNIQUES

Brief · sketch · brush · colour · form · layers · perspective/depth · overlays · critique · export

© Tertiary Infotech Academy Pte Ltd

Lab 12 · Acceptance & Debrief

1 **Evidence 1**
Instruction sequence is immediately understandable

2 **Evidence 2**
Luxury cues do not reduce legibility

3 **Evidence 3**
Layered file supports revision

4 **Evidence 4**
Design passes greyscale, thumbnail and sensory-load checks

5 **Evidence 5**
Rationale documents A1–A5 decisions

© Tertiary Infotech Academy Pte Ltd

TOPIC RECAP

Topic 3 · What You Can Now Do

1

Explain

Critique, emotion, human factors and responsible refinement

2

Create

Apply the topic's concepts in a real-use lab deliverable.

3

Evaluate

Use evidence and acceptance criteria to improve the work.

4

Transfer

Repeat the intent in either Procreate or Sketchbook Studio.

© Tertiary Infotech Academy Pte Ltd

COURSE SUMMARY

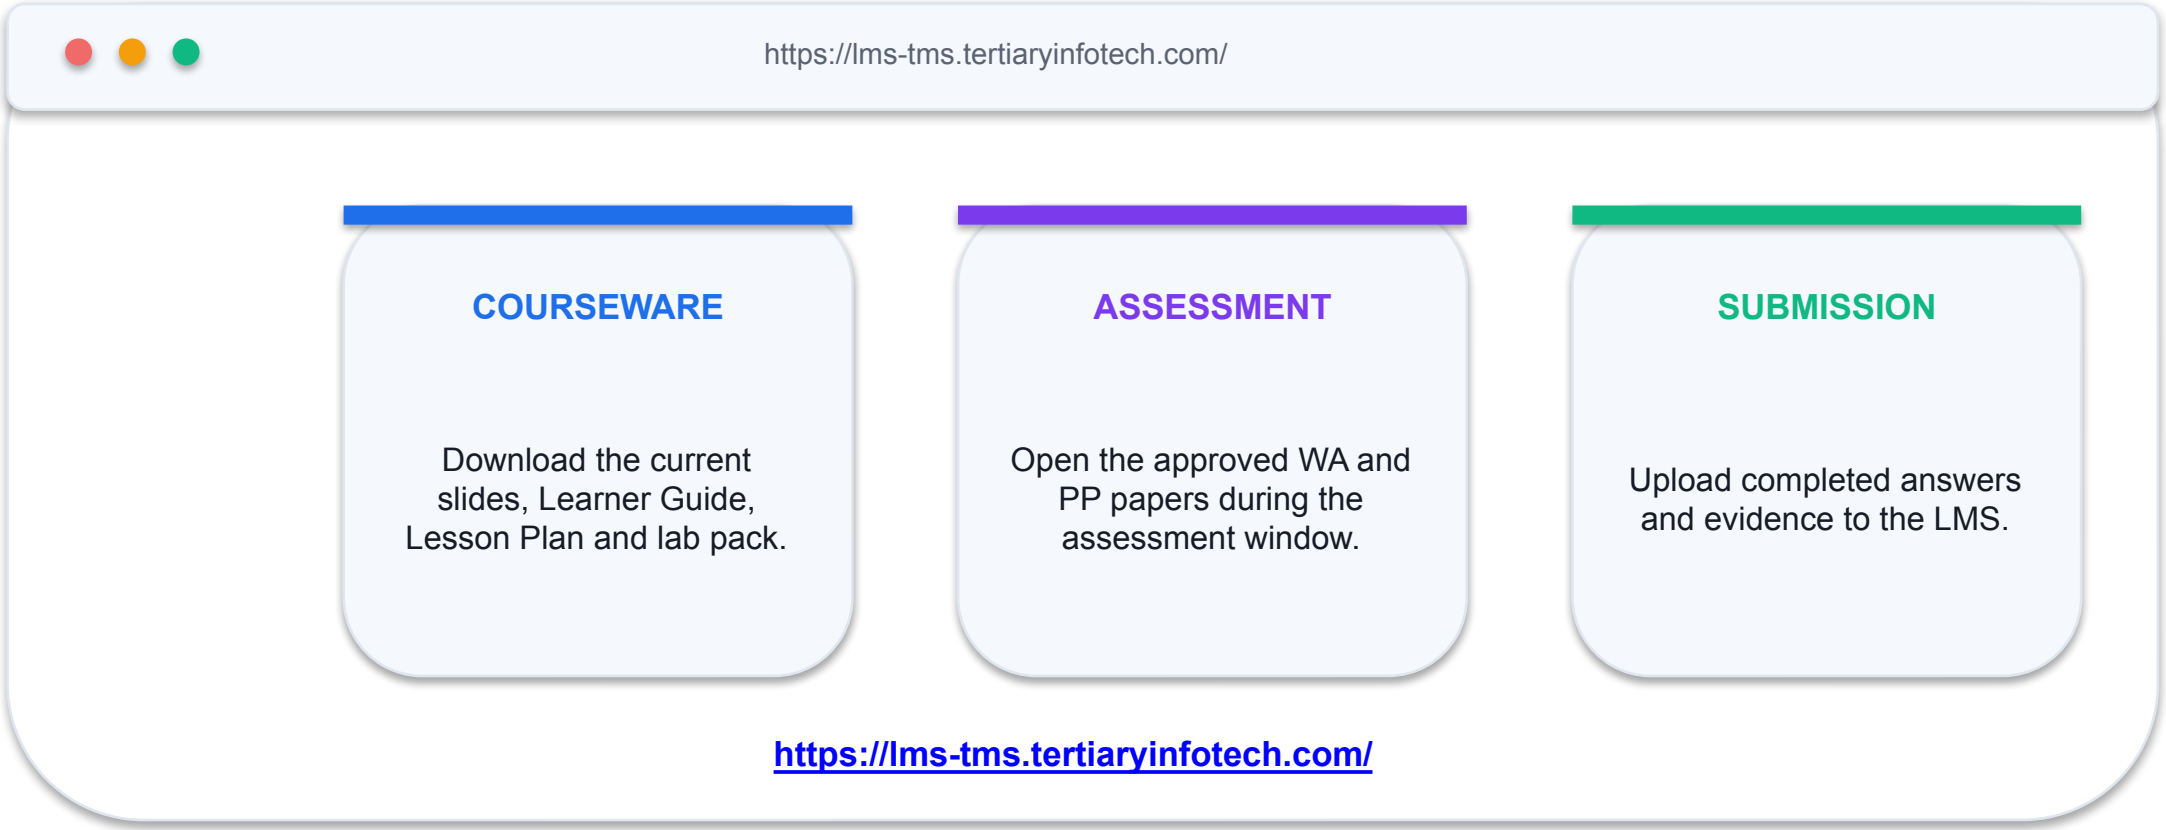

What You Achieved

1. **Purpose**
   Turn a brief into explicit aesthetic and sensory criteria.
2. **Craft**
   Control line, brush, colour, form, perspective, layers and light.
3. **Judgement**
   Balance attractiveness and function using evidence.
4. **Responsibility**
   Review accessibility, sensory load, sustainability and reference ethics.
5. **Versatility**
   Transfer the same visual intention across two iPad tools.
6. **Evidence**
   Present an editable master, exports, critique record and rationale.

© Tertiary Infotech Academy Pte Ltd

DOWNLOAD · COMPLETE · SUBMIT

Courseware & Assessment on the LMS

© Tertiary Infotech Academy Pte Ltd

FINAL REMINDER

Assessment

WA · 60 min

10 open-ended knowledge questions; answer in your own words.

PP · 60 min

5 tasks based on the luxury-hotel poster scenario.

Complete

Take attendance, submit on LMS and sign the Summary Record.
